

LAS GALLINAS VALLEY SANITARY DISTRICT

Nute Engineering has completed studies, engineering design, ESDC, construction management, and field observation for numerous pipeline projects, pump stations and wastewater treatment plant improvements for the Las Gallinas Valley Sanitary District.

Sewer Main Rehabilitation 2013

Engineering Services: CM and Inspection

Our firm provided complete ESDC, construction management, and full-time field observation for this District design that included installation of 11,000 LF of 8", 12", and 24" HDPE and PVC pipe by pipe bursting and direct burial. Nute Engineering's role also included obtaining over 100 notarized right-of-entry's for approximately 130 properties prior to construction. The construction management required careful planning due to work in multiple locations and public outreach required for replacement of easement sewers and lower laterals in steep terrain.

Contractor: Bay Pacific Pipelines

Construction Cost: **\$2,900,000**

Nute Engineering Staff: David Stier (CM), Mark Wilson
