

## **LAS GALLINAS VALLEY SANITARY DISTRICT**

Nute Engineering has completed studies, engineering design, ESDC, construction management, and field observation for numerous pipeline projects, pump stations and wastewater treatment plant improvements for the Las Gallinas Valley Sanitary District.

### 2015 Miscellaneous Wastewater Treatment Plant Improvements: Phase 1 *Engineering Services: Design, CM and Inspection*

*Project Description:* The Las Gallinas Valley Sanitary District's wastewater treatment plant required the replacement of an aging grit separation system, digester improvements, and various electrical improvements. Nute designed the project and is currently providing construction management services including a part-time resident engineer on site each day.

*Contractor:* West Bay Builders

*Construction Cost:* **\$1,845,500**

*Nute Engineering Staff:* Mark Wilson (CM), Adrian Bartshire (Resident Engineer/Inspector)
